EDUCATION

University of California, Berkeley

Master of Science in Mechanical Engineering.

Expected May 2027

University of California, Berkeley

Bachelor of Science in Mechanical Engineering. Dean's List, College of Engineering (Spring 2023, Fall 2023, Spring 2024); Guangyi R. Zheng Prize (2026). GPA: 3.960/4.0.

May 2026

EXPERIENCE

Mechanical Engineering Expert

August 2026 – Present

Mercor

Remote

- Evaluate AI-generated mechanical engineering content for technical accuracy, providing well-reasoned feedback and curating essential reference materials.
- Collaborate with cross-functional subject-matter experts to share insights on engineering workflows, tools, and best practices.

Undergraduate Researcher

January 2025 – Present

Kamrin Group, UC Berkeley

- Co-lead an independent project optimizing the open-source PeGS codebase, which estimates inter-particle forces in 2D granular flow from photoelastic fringe patterns.
- Replaced legacy models with complex energy potential methods, improving accuracy and computational speed by two orders of magnitude.
- Refactored codebase for vectorization and parallelization; implemented custom Jacobian-based solvers for faster particle solutions.

Design Intern

May 2023 – July 2024

Saturday Robotics

Boston, MA

- Led concept design and development of large-scale steel superstructures optimized for spatial efficiency and integration of industrial machinery at a stealth-mode robotics startup.
- Engineered versatile bent sheet metal adapter plates enabling five unique mounting orientations, reducing part count and improving cable management and electronics ergonomics.
- Designed and manufactured custom fit-tools to support specialized assembly and maintenance needs.

Course Reader

Fall 2024 – Spring 2026

Department of Mechanical Engineering, UC Berkeley

- Evaluated technical coursework and examinations for an undergraduate mechanical engineering curriculum, ensuring alignment with departmental standards.

PROJECTS

Card Shuffler and Dealer

Course: Mechatronics Design

- Designed and manufactured a compact mechatronics platform using SolidWorks and 3D printing to automate card shuffling, alignment, and multi-player distribution.
- Engineered a custom mechanical transmission using synchronized gear trains, belt drives, and a friction-based roller to separate single cards while preventing double-feeding.
- Developed embedded control logic on an ESP32 microcontroller for multi-axis motion control (stepper, servo, and DC motors) and wireless player button assembly interfacing.

Speaker Remote

Course: Electronics and Internet of Things

- Engineered a wireless ESP32-based remote for Audioengine A5+ speakers to control volume and mute via IoT without line-of-sight.
- Developed precise encoder signal interception and logic-level shifting for seamless volume synchronization and input queuing.
- Designed ergonomic 3D-printed housing with USB-C charging and an integrated alphanumeric display for real-time feedback.

AWARDS & HONORS

- Guangyi R. Zheng Prize, UC Berkeley (2026)
- Dean's List, College of Engineering: Spring 2023, Fall 2023, Spring 2024
- Honors to Date: August 2022 to May 2026

ATHLETICS

- UC Berkeley Varsity Track and Field, August 2022 to May 2027
